Why Small Sided Games

(From US Youth Soccer):

1. Because we want our young soccer players to touch the soccer ball more often and become more skillful with it! (Individual technical development)
2. Because we want our young soccer players to make more, less-complicated decisions during the game! (Tactical development)
3. Because we want our young soccer players to be more physically efficient in the field space they are playing in! (Reduced field size)
4. Because we want our young soccer players to have more, involved playing time in the game! (More opportunity to solve problems that only the game presents)
5. Because we want our young soccer players to have more opportunity to play on both sides of the ball! (More exposure to attacking and defending situations)
6. Because we want our young soccer players to have more opportunities to score goals! (Pure excitement)
7. Because we want to include children of all temperaments, assertive to shy, to have more opportunities to interact with others and the game! (Socialization)

The "Small-Sided" environment is a developmentally appropriate environment for our young soccer players. It's a FUN environment that focuses on the young soccer player.
